Hello Sue. Please see the attached document. Overall, there were many inconsistencies and errors. Unfortunately, many still exist. Sorry I couldn't peg them all after a few passes; I'll go through it a few more times this week. We really need to standardize titles and abbreviations. Also, I'd prefer dropping the use of first person.

I was able to update all alternatives. I still need to confirm 2 sections that I left as red text. I'll update those when the data is provided to me. A major change is that Alt 2 will result in a complete sheep liquidation and Alt 3, a 50% reduction in numbers. The reduction is not that big of a deal, it is the loss of summer range. Both Alts do NOT meet program objectives.

All sections and(or) paragraphs from the 1st to the last page, have been modified to reflect what we really do. If you will allow, I'd prefer to work off of the attached document. If you need a document showing all the changes let me know. I'll be working on the flow of this throughout the week as well as the other document that you sent. So, if you would like to visit, please let me know.

In truth, I am excited to go through these documents and I very much appreciate that you are involving me. I'll be in touch. Have a great week. -Bret \_\_\_\_\_

Thanks Bret. I'd rather have it correct and late than on time and wrong ☺

Hello Sue. I hope you are doing well. I'm making good progress on the Alternate Priority document. We've found a few errors on AUM and stocking numbers. We're readjusting the estimates now. I will not have this to you tomorrow evening, but will have it ready for you first thing Monday morning. Thank you for your patience. -Bret
